

63,5 MM

The image shows a technical drawing of a cylindrical component. The drawing consists of an outer vertical line on the left and right, and a top and bottom horizontal line. The top and bottom horizontal lines are slightly shorter than the vertical lines, creating a rounded appearance at the top and bottom. Inside this outer boundary, there are two concentric horizontal ellipses representing the circular cross-section of the cylinder. The top ellipse is slightly larger than the bottom ellipse, suggesting a slight taper. A vertical dimension line on the left side, with arrows at both ends, indicates a height of 63,5 MM. A horizontal dimension line at the bottom, with arrows at both ends, indicates a diameter of Ø120 MM.

Ø120 MM
